# BIANCA–GABRIELA ASĂVOAEI
*resume*

### PASSIONATE FULL–STACK DEVELOPER

I'm a Full–Stack Developer who loves turning ideas into functional web apps. I focus on user experience, performance, and clean, maintainable code. I've worked on personal and freelance projects ranging from portfolios to full–stack apps. I'm always learning and looking to grow as a developer.

## EXPERIENCE

### February 2024 – Present
### Full–Stack Developer at Waydev Inc.

- Built dynamic and interactive user interfaces using Vue.js
- Handled backend development using PHP Laravel
- Implemented test coverage for business logic using PHPUnit
- Debugged and resolved issues on both frontend and backend
- Designed and developed new features from scratch

### July – December 2023
### Junior Backend Developer at InfoWorld SRL

- Unit testing NodeJs
- Working on SQL procedures in Database Microsoft Azure
- Solved bugs on Mobile and Web Applications

## EDUCATION

### July 2024
Bachelor of Computer Science
University of Bucharest

## TECHNICAL SKILLS

C++, ReactJs, NextJs, VueJs, Vite, NodeJs, Express, Typescript, PHP

MySql, MongoDB, MariaDB

GitHub, Bitbucket, Docker, Microsoft Azure, AWS

## LANGUAGES

Romanian – Native

English – Professional Proficiency

Italian – Basic Communication

## PROJECTS

### My Website (biancagabriela-dev.com) [Source Code]

My portfolio, built with Vue.js, showcases a variety of web development projects. It includes:

- A presentation website for a catering business, built with Next.js, demonstrating my ability to create clean, responsive layouts.
- An artist presentation website, developed with React, showcasing interactive features and an engaging user experience.
- A backend application, designed to test routing and authentication, including both classic login and Google authentication, with data stored in MongoDB. A simple frontend was added using React.js.

These projects highlight my skills in frontend frameworks, backend development, authentication, and database integration, while focusing on user experience and scalability.
